

## FILTRATION - VOLUME 11(1)

Removal of fine particulate matter from exhaust gases by metallic microsieves

E. Stahl, J. Robert and G. Deerberg

Design of a new high performance drum filter for the chemical industry  
T. Langeloh and R. Bott

Determining the pressure dependence of permeability characteristics from a single constant pressure filtration test

E. Iritani and N. Katagiri

Mitigating and modelling membrane fouling by bioactive mixtures  
Z.S. Saleh, J.M. Farr and S.A. Friedrich

Polymer extrusion filter design with a hybrid PSO-GA optimization approach

K.R. Fowler, E.W. Jenkins and B.M. McClune

## FILTRATION - VOLUME 11(2)

Study of deposition and separation of submicron particles in nanofibre composite filters

T. Bahners and E. Schollmeyer

Filter media pore size comparison between porometry and challenge testing using spherical standards

G. Rideal and J. Storey

Production of concentrated yogurt using superabsorbents and a permeable membrane

A. Maskooki, A. Ahmadpour and M. Rezaee

Filtration of nanoparticles: Presentation of FANA test bench

N. Michielsen, T. Lelandais, C. Brochot and S. Bondiguel

Experimental study of the influence of process variables on the performance of a horizontal belt filter

M. Huhtanen, A. Häkkinen, B. Ekberg and J. Kallas

Evaluation of consolidation-sedimentation properties for the batch gravity sedimentation of concentrated suspensions

N. Katagiri, T. Hashimoto and E. Iritani

## **FILTRATION - VOLUME 11(3)**

A review of equipment selection and process design in solid/liquid separation

E.S. Tarleton

Clogging of industrial pleated HEPA filters in the event of fire in a confined and ventilated facility

V. Mocho and F.-X. Ouf

Outgassing characteristics of heated PTFE membrane filters with a thermoplastic support

J. Swanson and D. Pui

Challenge testing filters using certified microspheres

G. Rideal and J. Storey

Transition behaviour of filter loading characteristics for supermicrometre oil coated particles

T.-C. Hsiao and D.-R. Chen

'Bubble bobble' in the lauter tun – A new way for mash separation in the brewhouse

J. Tippmann, H. Scheuren, J. Voigt and K. Sommer

## **FILTRATION - VOLUME 11(4)**

Dixon rings – A revolutionary random column packing

R. Alford, M. Burns and N. Burns

Wet particle classification below 1  $\mu\text{m}$  – Challenge for basic research and technical development

H. Anlauf

Effect of acoustic waves on the performance of a multi-cyclone – filter system

L. Moldavsky, C. Gutfinger and M. Fichman

A porometer round robin program using filter media over a range of pore sizes

U. Beuscher, J. Brake, M. Doby and E. Mayer

Exploring the influence of feed material properties on full cycle optimisation of fill, squeeze and blow plate and frame pressure filters

R.G. de Kretser and P.J. Scales

Effect of face velocity, pleat density and pleat orientation on the most penetrating particle size, pressure drop and efficiency of HEPA filters

I. Al-Attar, R.J. Wakeman, E.S. Tarleton and A. Husain
