

FILTRATION - VOLUME 3(1)

Determination of best available techniques: Methods and case examples

D.A. Patterson

The use of ultrafiltration for cod reduction in pulp mill effluent - A case study from Sweden

A. Merry

Air filtration performance – Some real world results

B.D. Arnold and G.C. Deka

Practicalities of flocculant selection

D.S. Liley and M. Pearse

Characterisation and optimisation of a filter medium containing activated carbon and its application in purification processes

S. Cole, P. Koklitis and M. Weaver

Filters based on bioactive nanofibres

F. Tepper, L. Kaledin, G. Lukasic and S.I. Farrah

The application of mechatronic principles in pressure filtration and its impact on filter simulation

E.S. Tarleton and R.C. Hadley

The optimisation of multistage recycle ultrafiltration and reverse osmosis processes: An application for wastewater treatment

H. Niemi, J. Kallas and S. Palosaari

Comparison of electrocoagulation by iron electrodes and coagulation by iron salts dosing on latex suspensions

O. Larue and E. Vorobiev

FILTRATION - VOLUME 3(2)

A review of industrial flue gas cleaning

T. Golesworthy

Method for removing heavy metals from metal plating effluents
J. Heikkinen, P. Pirkonen, J. Koskinen, R. Lahtinen and A. Mahiout

Physical and biological treatment processes
K. Sutherland

Development of a zero discharge process for MDF effluent treatment
S. Massingham

Residual moisture reduction in coarse coal centrifuges using air purging
D. Condie, B. Johnston, S. Nicol and C. Veal

The use of surfactants in pressure filtration of very fine dolomite and quartz minerals
B.B. Gönül and Ö. Özcan

Gas cleaning using an atomised ultra freezing separation unit
J. Umbría, A. Macías-Machín, A. Lecuona and A. Espino

Permeation with vibrated media: Experiments and modelling
O. Gundogdu, M.A. Koenders, R.J. Wakeman and P. Wu

Measuring concentration and pressure profiles in deadend filtration
C. Johansson and H. Theliander

FILTRATION - VOLUME 3(3)

Removal of submicron fly ash from a biomass combustion unit with a novel 'carola' electrostatic collector
A. Bologna, H.-R. Paur and W. Baumann

Effluent treatment in the textile industry
A. Donn

Dirt repellent fabrics for deinked pulp dewatering processes
K. Järvinen and J. Hämäläine

Industrial experiences with low density ceramic filter elements
A. Startin and G. Elliott

Microfilters made with semiconductor technologies: A revolution in particle-fluid separation
H. van Heeren, W. Nijdam, D. van de Kerk, S. Sanchez, J. Vos and N. Denis

Wet electrostatic precipitation – Experience and legislation
K. Bell

The effect of a relative particle motion during the washing process of granular materials
B. Hoffner, J. Heuser and W. Stahl

Extraction and concentration of polysaccharides using a rotating disk filtration system
A. Brou, L.H. Ding, and M.Y. Jaffrin

Review paper: Dry scrubbing of flue gases
E.D. Archer and R.W.K. Allen

FILTRATION - VOLUME 3(4)

Nanoweb® - The route to high performance filter media
M. Rowlands, I. Schnieders and B. Heinz

Investigations into the recycling of process water using pressure filtration and new filter media
S. Voolooj, C. Carr and R. Lydon

Design considerations for automatic pressure filtration of flotation concentrates
I. Townsend

Advances in hot gas filtration
T. Stott and I. Boxall

Optimising precoat usage on a rotary drum vacuum filter
A. Walker

Obtaining data for sizing centrifuges
N. Pearson

Two sided electrofiltration of yeast suspensions: Filtration kinetics and physiological impact
H. Saveyn, K. Weber, P. Van der Meeren and W. Stahl

Magnetic resonance imaging (MRI) for non-invasive visualisation and quantitation of filtration and separation processes
F. Heese and L.D. Hall

Neural network modelling of vibration filtration
R.J. Wakeman and P. Wu
