

FILTRATION - VOLUME 10(1)

Fuel water challenges for high pressure common rail systems
B. Verdegan, H. Martin and T. Goodlund

A new method of filter efficiency evaluation using the nanoparticle surface area monitor (NSAM) for health relevant efficiency measure
N.J. Stanley, C. Qi and D.Y.H. Pui

Structure and pressure drop of real and virtual metal wire meshes
E. Glatt, S. Rief, A. Wiegmann, M. Knefel and E. Wegenke

Effect of vibrations on solids transport in a decanter centrifuge
B. Peeters

Overcoming emulsified water filtration problems in ULSD through stringent test methodology
C. Yang

Testing methods designed to comply with respiratory protection filter standards
H.-G. Horn

Simple model for finding the efficiency of a uniflow cyclone
S. Varanasi and P. Balasubramanian

FILTRATION - VOLUME 10(2)

Emerging challenges of fuel filtration
D. Wilfong, A. Dallas, C. Yang, P. Johnson, K. Viswanathan, M. Madsen, B. Tucker and J. Hacker

A new method of measuring pore size distributions using multi-modal particle size standards
G.R. Rideal, J. Storey and B. Schied

Industry state of the art in membrane filtration of fruit juice and wine for product clarification
E. Zimmer and D. Jermann

Importance of mechanical filtration in HVAC bags and panel air filter applications

J. Manns, D. Healey, S. Cox and A. Boni

Plate and frame pressure filter optimisation using plant load cell data: Advantages, challenges and outcomes

R.G. de Kretser, H. Saha, C. Biscombe and P.J. Scales

Advances in pore characterization for filtration membranes

K.-L. Tung, K.-R. Lee, C.-C. Hu, W.-S. Hung, T.-T. Wu, J.-Y. Lai, Y.-C. Jean, Y.-F. Song, G.-C. Yin and Y.-M. Chen

Dust emission characteristics of pulse-jet bag filters

H.-S. Park and K.S. Lim

Thermal stimuli controlled functional filter cloth for liquid filtration

P. Pirkonen, H. Setälä, H. Kyllönen, J. Sarlin, K. Salo, H. Tenhu and P. Ruuskanen

FILTRATION - VOLUME 10(3)

Reduction of carbon footprint in filtration with capillary action filters

B. Ekberg

Filtration and catalytic VOC destruction

A. Smith, D. McGee and B. Lang

The improved treatment of secondary effluent with ultrafiltration

T. Peters

The effect of pleat count and air velocity on the initial pressure drop and fractional efficiency of HEPA filters

I.S. Al-Attar, R.J. Wakeman, E.S. Tarleton and A. Husain

The separation of green liquor sludge: A comparison between liquors produced in a gasifier and a recovery boiler

T. Mattsson and T. Richards

Two stage process of single-pass inclined ultrafiltration for affinity chiral separation

E. Iritani, Y. Takaishi and N. Katagiri

FILTRATION - VOLUME 10(4)

Global study of air filter lifetime

W. Poon

Enhanced energy efficiency solutions for industrial baghouse filters

G.-M. Klein, T. Schrooten, T. Neuhaus, R. Esser, F. Ott and T. Daniel

Nanoparticle removal using fibrous filters

J. Steffens, J. Coury and C. Steffens

Laboratory settling analysis to predict separation in solid bowl centrifuges for ultrafine particles

G. Bickert

The environmental permitting regime in the UK

S. Taylor

High efficiency ePTFE membranes in air pollution control systems - Potential areas of reducing the carbon footprint

G.G. Pranghofer
