

FILTRATION - VOLUME 5(1)

Developments in gravity sedimentation

D. Gough

Testing methods for belt filter press biosludge dewatering

W. Chen, F. Parma and W. Schabel

Acceleration of gravity separation processes

P. Polasek and S. Mutl

Diatomaceous earth – Production methods and their impact on its use in precoat filtration processes

J. Schienke

Spectral dynamic efficiency of glass microfibre filters in liquid aerosol filtration

T. Frising, D. Thomas, P. Contal, D. Bémer and D. Leclerc

Filtration of fine particles by high gradient magnetic filtration

U. Kohaupt

Description of the particle puff emitted downstream of different dust separators consecutive to pulse-jet cleaning

X. Simon, D. Bemer, S. Calle, D. Thomas and R. Regnier

Fibrous filters: Non-invasive determination of local 3-D fibre structure by MRI

M.J. Lehmann, E.H. Hardy, J. Meyer and G. Kasper

Study of ternary glass spherical particle beds: Porosity, tortuosity and permeability

R. Dias, M. Mota, J.A. Teixeira and A. Yelshin

FILTRATION - VOLUME 5(2)

Evaluation of using heated solution techniques for removing membrane fouling

C.-C. Lin, C.-H. Yang and Y.-J. Chung

Methods of validating filtration materials using polymer microspheres
W.J. Silva, S. Duke and P. McFadyen

Pressure filtration of aggregated sewage sludge
S. Weir

Air filtration with fine polymeric fibres
J. George, R. Forna and T. Cravero

Filter testing - Getting closer to field performance
M. Day

Gas filtration using new granular material
M. Socorro, A. Macías-Machín , J. Verona and M. Macías

A review of existing and new ISO standards in the classification and measurement of compressed air purity and filter performance
S.N. Smith

Development of metallic membrane and its applications
Y. Fang, C. Kuang, F. Wang and H. Gu

Activated carbon – Its use in filtration processes and related disposal issues
M. Scholten

A novel technique for estimating the effective pore size and open area of densely woven filter fabrics
K. Järvinen

Analysis and modelling of starch dewatering
N. Salmela and M. Oja

Treatment of agricultural wastewater using ultrafiltration and subsequent reverse osmosis
W. Reimann

FILTRATION - VOLUME 5(3)

The application of laser particle size analysis to juice filtration in the sugar industry

P. Burroughs

A case study on textile effluent treatment

S. Das

Characterisation of the pore structure of complete filter cartridges using high flow porometry

A. Jena and K. Gupta

The world of filter media: A look at the marketplace

K. Sutherland

Gas cleaning using an atomised ultra freezing separation unit: VOCs recovery

A. Macias-Machín, J. Santana-Rodríguez and J. Umbría

Selecting the lowest cost dewatering process for fine industrial minerals

J. Kostuch, T. Hoskin and A. Phillips

Membrane separation technology for the purification of lactic acid after fermentation

W. Reimann

Pore size distributions in filter media deduced from the extended bubble point test

P. Johnston

Filtration – An integral part of the modern industrial process

P. Collins (pages 211-213)

Comparison of nanofiltration with flocculation - microfiltration - photocatalysis hybrid system in dissolved organic matter removal

H.K. Shon, S. Vigneswaran, J.-H. Kim, H.H. Ngo and N.E. Park

Improving floc characteristics by non-symmetrically alternative rotating flow

J. Xu, S. Ding, W. Wang and H. Xu

FILTRATION - VOLUME 5(4)

The effect of surfactant on the pressure filtration of clay minerals in the presence of flocculant

B.B. Gönül and Ö. Özcan

Comparison of surface filter test rigs according to VDI 3926 and JIS Z 8909-1

J. Binnig, N. Mao, J. Meyer, M. Hata, G. Kasper and C. Kanaoka

Applying filter aids to rotary drum vacuum filter installations

A. Walker

Concentrating on quality - Membrane filtration case studies

D. Dubbin

Introduction of an axial flow hydrocyclone

R.W. Chin and C. Metcalf

Aperture testing of sand screens using calibration microspheres

G. Rideal, J. Storey and T. Morris

Should I replace my electrostatic precipitator (ESP) with a fabric filter (FF)?

I. Fantom and C. Cottingham

Influence of liquid aerosol stop-and-go on the performance of fibrous filters

T. Frising, D. Thomas, J.-C. Appert-Collin, S. Callé-Chazelet and P. Contal

Development of high pressure filtration cloths

K. Järvinen, M. Oja and P. Rantala
