

FILTRATION - VOLUME 15(1)

Real world fuel water separation performance

M. Wieczorek, B. Verdegan and E. Quillen

Membrane technology – Past, present & future within the water industry

T. Peters

Water removal applications of an innovative coalescer element in mineral lubricating oils

R. Chen

Effect of silicon finish on the behaviour of regenerated surface filters at different dust concentration

A. Mukhopadhyay and S.R. Swain

The influence of ionic strength on the local filtration properties of titanium dioxide

T. Mattsson, J. Durruty, J. Wetterling and H. Theliander

Comparing adsorption of Bisphenol A and similar compounds in aqueous solution by syringe filters

N. Godby

FILTRATION - VOLUME 15(2)

The changing nature of diesel engine fuel filters for high pressure common rail (HPCR) diesel injection systems

B. Crook

Evaluation of the filtration performance of a rapid prototyped sintered filter element

E. Dimla

Developments in large scale filtration plants

J. Palmer

Standards for the compressed air industry
S.N. Smith

Aspects of the design and use of sedimenting centrifuges
C. Grimwood

FILTRATION - VOLUME 15(3)

A review of some developments in filter media
R. Lydon

Research and development activity on filtration and separation in
Japan – Milestones and state of the art
E. Iritani

Filtration and dewatering in wastewater treatment
M.L. Christensen

The importance of particle shape in determining the measurement
uncertainties in the maximum pore sizes of sand screens
K. Brocklehurst, A. Hassall, G. Rideal and A. Stewart

Non-stochastic lattice structures for novel filter applications fabricated
via additive manufacturing
H. Hasib, A. Rennie, N. Burns and L. Geekie

FILTRATION - VOLUME 15(4)

The filtration of high temperature, high pressure syngas from
gasification
A. Bevis

A new test system for the in-line monitoring of autoclave exhaust
treatment: A study of uncertainty
C. Grumbach and P. Czermak

Challenge testing – Current technologies and future prospects
K. Brocklehurst, A. Hassall, G. Rideal and A. Stewart

Metal filter cloth and new developments in high performance woven wire media

Haver & Boecker, Germany

The application of aerosol spectrometers in filter testing standards

S.N. Smith
