

## FILTRATION - VOLUME 9(1)

A review of industrial flue gas cleaning  
T. Golesworthy

Metal scavenging purification technology for the pharmaceutical and fine chemical industry  
K. Treacher

Filter media pore size comparison between porometry and glass bead challenge testing  
G. Rideal and E. Mayer

A new concept for simultaneous reduction of alkalinity, oil and undesirable gases such as CO<sub>2</sub> and H<sub>2</sub>S  
J. Chen and D. Douglas

Hot gas filtration – A case study highlighting successful dioxin control  
R. Williams

The impact of ultrafine bypass filtration on extended drain intervals  
R. Russell and T. Gilbert

Changing wastewater sludge characteristics affecting the fouling of a single stage mechanical dewatering and thermal drying process  
B. Peeters, L. Vernimmen and W. Meeusen

Performance of filters when loaded with NaCl and KCl particles in low relative humidity environments  
T.-C. Hsiao and D.-R. Chen

CFD based development of inertial separators in oil mist removal from crankcase emissions  
S. Schütz, K. Kissling, G. Gorbach, A. Zink and M. Piesche

## FILTRATION - VOLUME 9(2)

Electropositive filtration technology in automobile manufacturing  
F. Tepper, H. Frank and R. Lancaster

Filtration technology – Its impact upon our lives and the environment  
D. Dubbin

Closed loop controller in a dwell time based gas filtration system  
M. Marcelo, A. Malino, J. Mercurio, M. Retirado and B. Sicat

From warfare to healthcare  
J. Taylor

Adsorptive filter media (AFM)  
H. Patzelt

Inorganic membranes fabricated by air plasma spray coating  
K.-L. Tung

Changes in slurry concentration during the initial stages of filtration  
A. Genç and I. Tosun

Nanofiltration: A method for improving the purity of fuels and non-  
aqueous solvents  
E.S. Tarleton and J.S. Low

Investigations on the miniaturisation of pressure filtration processes  
S. Jermann, A. Schreiner and R. Schneeberger

Reconstruction algorithms for the internal packing density distribution  
of fibrous filter media based on tomographic data  
J. Hoferer, L.M. Hoffmann, J. Goebbels, G. Last, W. Weil and G.  
Kasper

Yeast microfiltration using a modified surface filter  
M. Stillwell, R.G. Holdich and S. Kosvintsev

## **FILTRATION - VOLUME 9(3)**

The international market for filter media: Its characteristics, trends and  
drivers  
K. Sutherland

Lab protocol for a spin tube test, simulating centrifugal compaction of activated sludge

B. Peeters, L. Vernimmen and W. Meeusen

A new magnetic filter for selective bioseparation

C. Eichholz, M. Stolarski and H. Nirschl

Conditioning of filter bags with reactive CaO and Ca(OH)<sub>2</sub> dust in flue gas

M. Koch, M. Saleem, P. Pucher and G. Krammer

A simulation based optimization approach to polymer extrusion filter design

K.R. Fowler, E.W. Jenkins, S.M. LaLonde and C.L. Cox

Mechanical sensors for identifying nano/micro particles

D.W. Dareing and T. Thundat

## FILTRATION - VOLUME 9(4)

Reduction of the carbon footprint for sludge handling by optimization of a combined centrifuge-dryer apparatus

B. Peeters, A. van Brecht, D. Rombouts and J. de Bock

Filtration and sedimentation behaviour of fibre/particle binary suspensions

K. Chellappah, E.S. Tarleton and R.J. Wakeman

Removal of organics from wastewater using nanofiltration

O. Farid and J.P. Robinson

Recent developments in ISO standards in the field of compressed air analysis & characterising compressed air filter performance

S.N. Smith

The use of syringe filters for analytical sample preparation: Including HPLC and dissolution testing

L. Scheer

Predicting settler/clarifier behaviour: The role of shear effects  
S.P. Usher and P.J. Scales

Virtual diesel particulate filters: Simulation of the structure, exhaust gas  
flow and particle deposition  
S. Rief, D. Kehrwald, A. Latz, K. Schmidt and A. Wiegmann
