

FILTRATION - VOLUME 8(1)

Automation in filtration systems: How telemetry could improve operating margins for both supplier and operator

D. Harris

New thinking on wet magnetic treatment of feldspar

P. Fears

Comparison of membrane filter presses with belt filter presses and centrifuges

E. Mayer

A new method to determine the particulate filtration efficiency of submicron cartridge filters

C. Peuchot and N. Petillon

On-line monitoring and optimisation of baghouse filter operations to reduce operating costs and minimise particulate emissions

W. Averdieck

20 years operating experience of wastewater filtration in Germany

M. Barjenbruch and T. Rolfs

Oxygen enrichment of air for diesel engines: Process evaluation study

P. Chitta and B.J. Tatarchuk

Similarity analysis of constant pressure cake filtration

A.K. Gholap, J. Peddieson and S. Munukutla

Simulation of liquid phase accumulation for the centrifugal dewatering of activated sludge

M. Mota, J.A. Teixeira, G.N. Abaev, I. Yelshyna and A. Yelshin

FILTRATION - VOLUME 8(2)

Suppression of 'filter cake' within a media pressure filter by vortex surface scouring

D. Ward, S. Cupples, R. Poole and I. Owen

Innovative technologies in water treatment based on ultrafiltration
T. Peters

Characterizing a filter medium
P.R. Johnston

The use of electrostatic filter media in the development of a new personal aerosol sampler
M.M. Abdel-Salam

Multi-layer deep bed filter for micron/submicron separation
T. Bahners and E. Schollmeyer

Effect of aeration on alum consumption and settling characteristics during water treatment
J.O. Babatola, T.O. Saiki and M.O. Ogedengbe

Prediction of filtration characteristics by multivariate data analysis
A. Häkkinen, K. Pöllänen, S.-P. Reinikainen, M. Louhi-Kultanen and L. Nyström

N95 face mask under increasing solids loading and moisture
W.W.-F. Leung, J. Chung, C. Tsang and C.-H. Hung

Modelling of deep bed filtration with scale dependent diffusion and superficial velocity
A. Al-Mudhaf, A.J. Chamkha and J.M. Al-Humoud

FILTRATION - VOLUME 8(3)

Guarantee high dust collector efficiency and preserve profits
A. Dotti

Ahlstrom disruptor™: Nanoalumina fibre water filtration media
R. Komlenic

Microfiltration with rotating membranes
Y. Taamneh and S. Ripperger

A study of the mechanism of wet and dry filtration using NIST traceable glass microspheres

G. Rideal, E. Roberts, A. Stewart and J. Storey

Defouling of polymeric membranes during microfiltration processing using ultrasound in various membrane modules

A. Maskooki, S. Ali.Mortazavi and A. Maskooki

Polyelectrolyte conditioning effect in sludge electrodeewatering

H. Saveyn, G. Pauwels, R. Timmerman and P. van der Meeren

Characterization of sludge filtration

H. Yukseler, U. Yetis and I. Tosun

Improving low separation performance of toluene from n-heptane via emulsion liquid membranes containing cyclodextrins as carriers

M. Chakraborty and H.-J. Bart

Numerical study of flow and pressure characteristics for diesel particulate filters with square and triangle channels

X. Zhang

A new method to obtain information about the pore size distribution in microporous polymeric membranes

J. Llorens, P. Marco, J. Sabaté, M. Pujolà, I. Felip and E. Plumed

Interdependence of fine particle filtration performance and dust load for electrostatic media

J.A. Schütz

FILTRATION - VOLUME 8(4)

Membrane bioreactors (MBR) - An advanced process for wastewater treatment

C. Deakin

Improving seawater desalination with reverse osmosis

T. Peters

Trends and technology related to filter media development
R. Lydon

Computer software for the automated specification of solid/liquid separation equipment
E.S. Tarleton and R.J. Wakeman

The impact of economic and commercial issues in municipal waste management
J. Heath and I. Crummack

Pressure filter process optimizers and data acquisition systems
S. Manninen, L. Kaipia and K. Koskela

Filter aid pore size and pore structure characterization
E. Mayer and W. Li

Influence of membrane type on filtration characteristics and protein rejection in crossflow microfiltration
K.-J. Hwang and H.-S. Chiu

Equation of state for porous media: Theoretical properties of well-formed media
N.H. Andreas

A study of polyaniline membranes for gas separations
Y. Gupta and R.J. Wakeman

Prediction of pore size and pressure drop of porous woven wire cloth filter media on the basis of calculation models
S. Schütz, P. Kopf and M. Piesche
