

## FILTRATION - VOLUME 4(1)

Quick and reliable filter test according to PREN-779 or ASHRAE 52.2 with a new white light scattering sensor system

G. Lindenthal and L. Mölter

Evaluation of the screen performance in a wet grinding circuit

M. Oja, T. Knuutinen, P. Mörsky and H. Lehto

Cyclone design - An integrated approach

K. Morris

Comparative methods for the pore size calibration of filter media

G. Rideal, E. Mayer and R. Lydon

Production and uses of metallic surface microfilters with slotted and circular pores

R.G. Holdich, I.W. Cumming and S. Kosvintsev

Inverting filter centrifuges – Adding a siphon effect and an improved cloth inversion mechanism

F. Deshun and R.J. Wakeman

Wastewater recycling studies

S. Judd and B. Jefferson

Evidence for swelling induced pore structure in dense PDMS nanofiltration membranes

J.P. Robinson, E.S. Tarleton, C.R. Millington and A. Nijmeijer

Characterisation of the resistance behaviour and separation efficiency of precoat layers built up during crossflow filtration

H. Hess and W. Höflinger

Local filtration properties of kaolin filter cakes

P. Sedin and H. Theliander

## FILTRATION - VOLUME 4(2)

Evolution of filter test standards

C. Peuchot

Treating combined sewer overflows: Performance of high rate clarifiers and continuous sand filters

G. Glasgow and B.J. Morrow

Electrochemical methods for coolant oil regeneration

T. Yamamoto, C.-L. Yang, T. Nagaoka, M. Okubo, T. Kuroki and M. Okamoto

Application of the optical sensing zone method to filter monitoring

T. Wharton

Use of standard test dusts in filter challenge testing

R. Buxton

Molasses purification by integrated membrane processes

P. Pinacci, M. Radaelli, A. Bottino and G. Capannelli

Consolidation behaviour of gel emulsion cake in the filtration of o/w emulsions with and without solid particles

E. Iritani, Y. Mukai, N. Katagiri and I. Yoshii

Development of novel membranes with controlled porosity from fluorinated polymer

A. Bottino, G. Capannelli, A. Comite and M. Oliveri

Computer modelling of pleated cartridge filters for viscous fluids

W.R. Ruziwa, N.S. Hanspal, A.N. Waghode, V. Nassehi and R.J. Wakeman

Influence of the collector on phosphate flotation in a column

G.M. Queiroz, M.S. Oliveira, D.R. Cioqueta, C.H. Ataíde and M.A.S. Barrozo

## FILTRATION - VOLUME 4(3)

Characterisation of nanofibre filtration media by capillary flow porometry

A. Jena and K. Gupta

Performance of different primary filtering media in rotary vacuum drum filters for sugar cane mud

W. Polonio

The whirlpool separation system and its industrial application

H. Nirschl and V. Denk

New test system for practical filter test of cleanable surface filter media at temperatures up to 250°C and in relative humidity up to 80%

M. Schmidt and L. Mölter

Filter media testing for starch filtration systems

N. Salmela and M. Oja

Metallic filter elements: Determining an element's suitability for reuse after cleaning

R.A. Smith

Charge effects of dispersed systems and membrane surface on crossflow microfiltration

D. Smidova, P. Mikulasek, R.J. Wakeman and P. Velikovska

Influence of additives on the sedimentation behaviour of fine grained solids in the centrifugal field

M. Beiser and W. Stahl

Filtration and washing characteristics of concentrated cobalt hydroxide suspensions

H. Saveyn and P. van der Meeren

Laboratory, pilot and industrial scale validation of numerically optimised reverse flow gas cyclones

R.L.R. Salcedo, V.G. Chibante and I. Sôro

## FILTRATION - VOLUME 4(4)

Corrugated high efficiency filter medium Viledon FE 2507 sine – Long term field tests and comparison with laboratory tests

M. Waldenmaier

Influence of cleaning parameters on pulse-jet filter bag performance

X. Simon, D. Thomas, D. Bémer, S. Callé, R. Régnier and P. Contal

The turbo magnetic oil filter 'Uragan-M'

A. Karabach and I. Dun

Extended area filtration in nonwovens polymer processing

R.A. Smith

Optimisation of sludge management in leisure parks by low pressure reverse osmosis

D. Kunz, E. Schmidt and T.A. Peters

Use of analytical centrifugation for solid-liquid separation in decanter centrifuges: Selection of flocculants for sludge dewatering

T. Sobisch and D. Lerche

Optimisation of candle filters using 3-D flow simulations

K. Velten, M. Günther, B. Lindemann and W. Loser

Effect of aerosol concentration on the electrostatic precipitation of nanoparticles

A. Marquard, J. Meyer and G. Kasper

Durability validation of synthetic filter bags

S. Tanaka and C. Kanaoka

High pressure expression of cocoa suspensions: An overview of the butter extraction mechanism

J.-L. Lanoisellé, G. Piar and E. Vorobiev
