

## FILTRATION - VOLUME 7(1)

Overview and recent developments in particle decontamination by washing processes

H. Anlauf

Polymeric and ceramic nanofibres

J. Steffens

Three steps to a new filtration quality: Modernisation of filter plants by revamping

T. Langeloh and R. Bott

Evaluation of electrostatic filter media for aerosol sampling and analysis

M.M. Abdel-Salam

Measurement of bioaerosol filtration efficiency in an ASHRAE 52.2 filter test facility

W. Tang, M.A. Ramakrishnan, S. Goyal and T. Kuehn

Pulsed electric field assisted solid/liquid expression of agro-food materials: Towards a novel environmentally friendly technology

E. Vorobiev, L. Praporscic and N. Lebovka

Particulate emissions from filter based gas cleaning devices and their characterization according to PM<sub>2.5</sub> criteria

G. Kasper, J. Binnig and J. Meyer

The pressure driven membrane bioreactor vs. the ion exchange membrane bioreactor: Advantages and limitations

S. Velizarov, A. Barreiros, C.T. Matos, M.A. Reis and J.G. Crespo

Linking dewatering parameters from traditional, fluid mechanical and geotechnical theories

R. de Kretser and P. Scales

Nanofluidics in filtration and particle processing

H. Nirschl, R. Wengeler and B. Schäfer

Investigation of filtration conditions for nanofiltration of reactive dye printing wastewater

N.P.R. Andersen, M.L. Christensen, K. Keiding and I. Petrinić

Improving CFD simulations of lubricant oil fibrous filter media

M.J. Lehmann and P.K. Herman

## **FILTRATION - VOLUME 7(2)**

Definite and quick characterisation of fractional separation efficiencies in unknown aerosol concentrations

M. Schmidt

CFD analysis on the effect of calendering of filter cloth on transient characteristics of cake filtration

K.-L. Tung

New ISO standards for compressed air analysis and filter testing

S.N. Smith

Recycling of process water using microfiltration and novel composite filter media

S. Volooj, C. Carr and R. Lydon

Applicability of fabric filters in air pollution control (APC) for waste incineration plants

G.G. Pranghofer

Comparison of different filter aid permeability test methods

W. Li, C. Kiser, Q. Richard and E. Mayer

Physical measurement of pores by glass bead challenge testing

G. Rideal

Testing filter media for liquid filtration

R.J. Wakeman

Nonwoven fabrics as solid/liquid separation media in a membrane bioreactor

W.-K. Chang, S.-H. Chuang, A.Y.-J. Hu and M.-C. Chang

Measuring particle deposition within fibrous filter media by magnetic resonance imaging

J. Hoferer, E.H. Hardy, J. Meyer and G. Kasper

Filterability and ageing of crystalline potassium sulphate salted-out with ethanol and acetone

M. Louhi-Kultanen, A. Llansana Arnalot, L. Nyström and J. Kallas

Tube settlers for the enhancement of settling tank capacity

K. Fujisaki and M. Terashi

## **FILTRATION - VOLUME 7(3)**

Characterisation of particle penetration and dust holding capacity of surface treated needlefelts

W. Höflinger, H. Rud and G. Mauschitz

Design considerations for crankcase ventilation systems to meet future diesel engine emission regulations

P. Banerjee, B. Verdegan, B. Schwandt, C. Holm and S. Heckel

Streaming current monitoring (SCM) of industrial flocculation processes

E. Mayer

Membrane filtration concept and catalytic filtration

G.G. Pranghofer

Nanofiltration – A method for solute removal from liquid hydrocarbons

E.S. Tarleton and J.P. Robinson

Measurement of the efficiency of depth filters for water treatment

M. Zielina and L. Hejduk

Clean production and significant energy savings with a hybrid separation process – Hi-Bar steam pressure filtration

T. Langeloh and R. Bott

Influence of leaks in surface filters on particulate emissions

B. Bach and E. Schmidt

Performance of baghouse dust collectors in the woodworking industry

D. Bémer, X. Simon, R. Régnier, I. Subra and B. Honnert

Continuous metal recovery process using polymer enhanced ultrafiltration

J. Sabaté, M. Pujolà, J. Llorens and P. Marco

Statistical modelling of the pore structure of stochastic fibre networks

W.W. Sampson

## FILTRATION - VOLUME 7(4)

Performance of pressurised agricultural vehicle cabs against pesticides – Aerosol testing method

D. Bémer, I. Subra, M.T. Lecler, J.P. Larrat and D. Schaeffner

Who are the culprits? – Potential contaminants of foods and beverages

G. Shama

Minimizing the pressure drop across filters with multi cylindrical tubes

M. Buzanowski and D. Fadda

Testing anti-microbial effectiveness in pool filter media

P.J. Angelini

Large scale bag filtration enhanced by electrostatics

C.-V. Rasmussen, M. Koch, H.V. Pedersen and G. Krammer

Experimental comparison of fractional efficiency measurements according to ISO TS 11155-1, ISO 5011, EN 779 and ISO CD 20564

M. Schmidt and S. Schütz

Role of flocculant injection and mixing conditions in sludge flocculation  
P. Ginisty, C. Peuchot and A. Premel

An improved method for washing lignin precipitated from kraft black liquor – The key to a new biofuel  
F. Öhman, H. Wallmo and H. Theliander

Examples of air flow patterns in food production areas  
D. Burfoot

The production and certification of precision slotted sieve standards  
G. Rideal

Particle pressure induced transient changes in oscillated particle-fluid systems  
M. Davis and M.A. Koenders

Artificial neural network model to predict compression-permeability characteristics of solid/liquid systems  
M. Iwata, M.S. Jami and S. Shiojiri
